TRUCK FARMING .- We call the attention of our readers, to the following letters of Col. Fremont of the Wilmington and Weldon Rail Road, and Col. Cannon of Portsmouth Va., taken from the Wilmington Journal of a late date.

The large majority of planters have begun to realize the fact, that under the present system of labor the days of large more attention must be paid to the cultivation of those products of the soil which promise a greater profit at less labor and

Prominent among these may be classed the cultivation of Grapes, Fruit and Vegetables, and in no other portion of the State can these productions be raised to better advantage than in Edgecombe Coun-

forms; indeed many miles around Tarboro' could be most advantageously devoted the same object, yielding to the cultivators thousands of dollars, which in the present and future embarrassed condition of the Country will prove of incalculable advantage to all concerned.

A former resident of this place, writing us in the sut ject says : "England, with other European Countrys have robbed us of thele Iture of cotton as a profit! Now let Edg ombe with North Carolina take the macy of the culture of Grapes, and and facture of the best wine in the world." This question should command the earnest consideration of our citizens, both as a sorree of profit to themselves and a sure means of releiving us all somewhat from the Tistressed condition in which we are

COL. S. L. FRENONT: Dear Sir :- I received your letter several eral vegetable commission men, before I answered you. The truckers prefer a light, dry, warm

soil. Their crop is over too early to be injured by drought, and they wish land not subject to be damaged by wet. Guano and stable manure are most used but lime ashes, bonedust, and other ma-

unres are very useful. PEAS are sowed in drills four or five inches wide, so that they hold each other up, and sticks are not needed. They are not much injured by cold. They are shipped in old flour barrels, which are bored full of large auger holes, and have the top tivation is not expensive, and the crop is very profitable.

Potatous are raised in the usual way, mate. except the ridge is smaller and flatter than May 18, and seil for \$8 per barrel. Tomatoes are sowed in a hot bed under

glass, just as ladies often raise early plants. When six to ten inches high they are planted exactly the usual way. The days before ripening they are gathered into one bushel boxes, nailed up with a slat top for ventillation. The first go from here June 25th, and bring \$18 per bushel. Cucumbers, Cantelopes, and Onions are likewise very profitable crops, and will bear transportation. The truckers say the lands on your road

Their calculation is on this basis: every ten miles South is one day earlier in production. Norfolk is the most Southern point of general supply of early vegetables. Any place of daily communication that can produce vegetables seven days earlier than Norrolk, will get all the high prices for the articles they supply. Hence they
